ZAYNAB ZENNOUR

APPLIED AI / PRODUCT ANALYTICS / DATA & BUSINESS SYSTEMS

San Jose, California | hello.zaynabz@gmail.com
linkedin.com/in/zaynab-zennour | github.com/hellozaynabz-art

Analytics and business systems professional with 9+ years across fintech, enterprise technology, and global operations. Builds trusted data foundations, translates complex signals into clear decisions, and develops AI-assisted workflows with source grounding, evaluation, and human review.

EXPERIENCE

Intuit / Credit Karma

Senior Business Analyst, Risk Operations | Aug 2025 - Jul 2026

- Led SQL dashboards and QuickSight reporting for product performance, user funnels, engagement, and risk operations; reduced ad-hoc reporting needs by 40% and data refresh time by 50%.
- Built Python anomaly detection that supported early identification of three major client-side issues.
- Designed BigQuery gold-table architecture and built Airflow DAGs to support fraud and policy-alert analysis; partnered with engineering, marketing, and operations on data strategy.
- Built AI-assisted workflows for alert triage, SOP search, and quality review; designed prompts and evaluation rubrics, piloted with analysts, and iterated with human review.

TCS - Microsoft contract

Program Manager | Dec 2023 - Jul 2025

- Coordinated data center supply chain programs across OEMs, vendors, procurement, engineering, and logistics.
- Tracked dependencies, delivery milestones, supply chain risks, and fulfillment blockers; built operational dashboards and self-serve leadership reporting.

Entirety

Lead Analyst | Aug 2022 - Nov 2023

- Built SQL and Python trend analysis and predictive models to identify early churn indicators, supporting 20% higher retention.
- Documented sources, governance practices, and modeling logic for repeatable analysis.

ZAYNAB ZENNOUR

EXPERIENCE, CONTINUED

OCP Group

Business Supply Chain Analyst | Oct 2016 - Aug 2022

- Built Tableau and SQL performance dashboards across work covering 12 regions; standardized 20+ enterprise metrics across operations, procurement, finance, and workforce planning.
- Automated monthly reporting with SQL and VBA, reducing manual reporting time by 60%.
- Built Python and Excel forecasting models for demand, inventory, headcount, and capacity, improving forecast accuracy by 20%.

SELECTED PROJECT EXPERIENCE

Healthcare encounter validation & reconciliation

- Validated encounter data from 142 files in the 837 format using Python and SQL; investigated missing provider IDs, invalid diagnosis codes, and duplicates.
- Reconciled 999/277CA acknowledgments and built a Power BI rejection dashboard, partnering with operations to correct recurring issues.

TECHNICAL & BUSINESS TOOLKIT

AI & automation: Agentic workflow design, prompt engineering, source grounding, AI output evaluation, quality rubrics, human-in-the-loop validation, AI-assisted SQL and reporting.

Data engineering: BigQuery, Snowflake, dbt, Airflow, Microsoft Fabric, Databricks, PySpark, ETL/ELT, dimensional modeling, data validation, reconciliation, Git and CI/CD.

Analytics & BI: SQL, Python, pandas, NumPy, scikit-learn, Power BI, Tableau, Looker, QuickSight, Excel/VBA, semantic models, KPI frameworks, and data storytelling.

Methods & delivery: A/B testing, causal inference, predictive modeling, forecasting, cohort and funnel analysis, fraud analytics, supply chain planning, requirements, program delivery, and cross-functional leadership.

EDUCATION

M.S., Business Analytics and Data Science
Hult International Business School

Executive M.S., Financial Engineering and Quantitative Analysis
L'Ecole Polytechnique de Paris X & Africa Business School

B.S., Applied Mathematics
